

GRIT

Complete Marketing Plan — Version 2

20 Strategies · USD Pricing · Free Trial System · Referral Programme

Yearly Fees · Creator Playbook · Zero-to-\$5K Sprint · Real Numbers

Confidential — June 2026

20 Strategies	598 Users = \$5K/mo	84% Gross Margin at \$9.99	20% Affiliate Commission
------------------	------------------------	-------------------------------	-----------------------------

PAGE 1 — HOW YOU GET PAID: EVERY REVENUE STREAM

Grit has six distinct revenue streams. Subscriptions are the engine — everything else stacks on top. Understanding every stream before you launch means you can monetise from day one.

All Revenue Streams — USD

#	Revenue Stream	Price (USD)	How You Get Paid	Monthly Potential
1	Monthly Subscription — Core	\$4.99/mo	Stripe auto-charges monthly	\$4.55 net after Stripe
2	Monthly Subscription — Pro	\$9.99/mo	Stripe auto-charges monthly	\$9.14 net after Stripe
3	Monthly Subscription — Elite	\$19.99/mo	Stripe auto-charges monthly	\$18.69 net after Stripe
4	Annual Plan — Pro	\$59.99/yr	Single Stripe charge upfront	\$58.60 net, paid today
5	Annual Plan — Elite	\$149.99/yr	Single Stripe charge upfront	\$147.89 net, paid today
6	Streak Freeze Add-on	\$0.99 each / \$3.99 x5	Impulse purchase via WhatsApp	\$0.50–\$2 per active user
7	90-Day Challenge Pack	\$49.99 one-time	Upsell at onboarding complete	One-time per user
8	Grit for Teams (B2B)	\$7.99/employee/mo	Annual invoice to HR dept	\$480/yr per 5-person team
9	Affiliate Commissions	5–30% per sale	Recommend products to users	Passive, scales with users
10	Referral Programme	20% of referred sub	Auto-calculated via Stripe webhook	Reduces your net CAC

Stripe Fee Reality Check (USD)

Stripe charges 2.9% + \$0.30 per transaction for US cards (or 1.4% + \$0.30 for European cards). This flat \$0.30 fee is critical to understand — it punishes low price points severely.

Price	Stripe Fee	Net to You	% Lost to Stripe	Impact
\$2.00	\$0.36	\$1.64	18%	■ Devastating — nearly 1 in 5 dollars gone
\$4.99	\$0.44	\$4.55	9%	■■ Significant but manageable
\$9.99	\$0.59	\$9.40	6%	■ Acceptable
\$19.99	\$0.88	\$19.11	4%	■ Minimal
\$59.99/yr	\$2.04	\$57.95	3%	■ Best ratio — annual billing wins

US card rates shown (2.9% + \$0.30). International cards may vary slightly.

PAGE 2 — FREE TRIAL SYSTEM & ANNUAL PRICING

The 7-Day Trial — Day by Day

Day	What Grit Sends	Purpose
Day 0 — Sign up	Welcome message → 10-question onboarding begins	Hook begins before they can second-guess
Day 0 — 5 mins later	Personalised 90-day PDF plan delivered in WhatsApp	Wow Moment — real value before paying
Day 1	Morning motivation image + quote at their location	Reinforcement: they wake up to Grit
Day 1 — Evening	First daily check-in: 'Did you do it today?'	Accountability loop activated
Days 2–4	Morning motivation + 2 check-ins daily. Streak building	Psychological investment grows daily
Day 5	Soft nudge: 'Your free trial ends in 2 days'	Plant the seed — no pressure yet
Day 6	Milestone message if streak is 6+ days: 'You've been consistent all week'	Loss aversion starts to kick in
Day 7	Payment options sent: 4 tiers, clear USD pricing	Convenient Stripe link
Day 8–10 (grace)	Daily gentle reminder if no payment: 'Your free trial expires today'	Reinforces urgency
Referred users	Same flow but 30-day trial + 20% off first month	Better conversion rate from warm referrals

Annual Pricing — The Best Retention Tool You Have

Annual subscribers churn at 5–10% versus 25–35% for monthly. One annual subscriber is worth 2–3 monthly subscribers. Push this hard.

Tier	Monthly Price	Annual Price	User Saves	You Receive Upfront	Effective Monthly for User
Core	\$4.99/mo	\$39.99/yr	\$19.89 (33%)	\$39.99 today	\$3.33/mo
Pro ★	\$9.99/mo	\$59.99/yr	\$59.89 (50%)	\$59.99 today	\$5.00/mo
Elite	\$19.99/mo	\$149.99/yr	\$89.89 (37%)	\$149.99 today	\$12.50/mo

★ 'Less than \$1.20 a week' is how to frame Pro Annual. Push it at end of trial and at 30-day streak.

The 5 Best Moments to Push the Annual Plan

Moment	Message Angle	Expected Conversion
End of 7-day trial	'Lock in Pro for the full year at \$59.99 — save \$6015-25% off trial converters	15-25%
30-day streak hit	'You've been consistent for a month. Commit to the 20-year 20% off price offered	20-30% at full price
Price increase notice	'Prices go up next month. Lock in current rate for 12-35% agency conversion	25-35%
January 1st campaign	'New year, full year. Start 2027 with 365 days of accountability	Seasonal spike — highest of year

Moment	Message Angle	Expected Conversion
After a missed streak	'Get back on track. Commit to the full year + 3 bonus streaks'	10-15% of repeat users

PAGE 3 — REFERRAL PROGRAMME: YOUR USERS AS A SALES TEAM

This feature is already built into the product. Every user gets a unique referral link. When someone signs up through it, the referrer earns 20% of every payment — automatically, every month, for as long as that person stays subscribed. Your users become a sales team that works 24/7.

How the Referral System Works — End to End

Step	What Happens	Who Does What
1	User texts SHARE to Grit	Grit sends them a pre-written WhatsApp message to forward to contacts
2	Contact taps the link	WhatsApp opens pre-filled: 'START BRETT-X7K2'
3	New user signs up	Gets 30-day free trial + 20% off first month automatically
4	New user completes onboarding	Referrer gets WhatsApp notification: 'Someone just signed up using your link!'
5	New user pays	Referrer gets instant WhatsApp: '£X commission added to your wallet'
6	Every subsequent month	20% commission auto-calculated from Stripe → credited to referrer wallet
7	1st of each month	Referrer gets monthly commission report + payout processed
8	User texts WALLET	Sees balance, total paid out, active referrals

What a Referrer Earns — USD Examples

Referrals Who Convert	Monthly Commission (20% of \$99)	Annual Earnings	What This Means
5 paying referrals	\$10/month	\$120/year	Coffee money — nice bonus
25 paying referrals	\$50/month	\$600/year	Side income — motivates sharing
100 paying referrals	\$200/month	\$2,400/year	Significant passive income
500 paying referrals	\$999/month	\$11,988/year	Full-time income from sharing one product
2,000 paying referrals	\$3,996/month	\$47,952/year	This is what a top creator affiliate earns

A fitness creator with 100K followers who drives 500 paying users earns \$999/month recurring — every month those users stay subscribed. This is more attractive than most flat-fee brand deals.

The Pre-Written Share Message (Fitness Version)

"Hey! I've been using this AI accountability coach called Grit and it's actually keeping me on track with my fitness goals ■ It texts me every day on WhatsApp, gave me a personalised 90-day plan as a PDF, and tracks my streak. You get a FREE 30-day trial (instead of the usual 7) plus 20% off your first month if you use my link. No app to download — just WhatsApp

■\n\n<https://wa.me/61XXXXXX?text=START+BRETT-X7K2>\n\nSeriously try it, it's changed my routine."

This message is auto-sent to users when they text SHARE. Finance and general versions also built in.

PAGE 4 — 20 MARKETING STRATEGIES (USD REVENUE MODEL)

Every strategy below includes the exact USD revenue model, execution cost, timeline to first results, and realistic monthly USD potential. Ordered from zero-cost to paid. Start at the top.

1

Personal Network — The First 50 Paying Users

Message 50 people you already know. Offer Founding Member pricing (\$7.99/month locked for life). Don't ask if they want it — tell them what you built and give them a direct link. Be honest: 'I need 50 people to test this, you'll pay less than anyone ever will.' This is the fastest \$400/month you will ever make.

Revenue model: Direct Stripe payment at \$7.99/month recurring. 50 people = \$400 MRR, zero acquisition cost.

Cost to execute: \$0 **Timeline to first results:** 48 hours **Monthly USD potential:** \$400/month immediately

2

Reddit — The Highest Free Traffic Source

Post in r/getdisciplined, r/productivity, r/Fitness, r/personalfinance, r/loseit. Title format: 'I built an AI that texts me every day on WhatsApp to keep me accountable — here's what happened.' Be genuine. Share your own experience. Add value in comments. One strong Reddit post = 300–1,500 trial sign-ups in 72 hours. No ad budget needed.

Revenue model: Free trial sign-ups convert at 35–45% to \$9.99/month. 500 sign-ups × 40% = 200 users = \$2,000/month.

Cost to execute: \$0 **Timeline to first results:** 72 hours **Monthly USD potential:** \$500–\$2,000 per post

3

Your Own TikTok Account — The Compounding Channel

Post daily for 30 days. Content ideas: show a morning motivation message, share a user streak, reveal what a 90-day PDF plan looks like, do a 30-day challenge in public. TikTok's algorithm rewards consistency. After 30 videos you have enough data to know what works. Profile link → WhatsApp trial. Zero cost except 10 minutes a day.

Revenue model: Bio link drives WhatsApp sign-ups → \$9.99/month conversions. One viral video = \$3,000–\$10,000 MRR spike.

Cost to execute: \$0 **Timeline to first results:** 2–4 weeks for traction **Monthly USD potential:** \$0–\$5,000+/month (high variance)

4

Instagram Reels — Screenshot Content That Spreads

Post weekly: user streak screenshots (with permission), morning motivation images watermarked with your link, 'what Grit sent me this morning' screen recordings. Reels showing authentic WhatsApp conversations outperform polished ads 3:1. Use trending audio. Post 3x per week minimum for the algorithm.

Revenue model: Bio link to WhatsApp trial. Each viral Reel can drive 100–500 sign-ups. Zero production cost.

Cost to execute: \$0 **Timeline to first results:** 1–2 weeks **Monthly USD potential:** \$200–\$1,500/month from organic

5

Micro-Influencer Seeding — Free Product for Organic Posts

DM 30 creators with 5,000–50,000 followers in fitness, finance, study, or wellness. Offer 30 days of free Elite access (\$19.99/month value). No obligation to post. Simply: 'I built this. I think your audience would love it. Try it free for a month.' 30–40% will post organically if they genuinely like it. Organic posts convert 3x better than paid.

Revenue model: 20% recurring affiliate on every subscriber they refer. Their income grows as long as users stay. Your CAC is \$2/month per referred user (vs \$10–18 with paid ads).

Cost to execute: \$0 (gifting free access costs you ~\$0.10 in API costs) **Timeline to first results:** 2–4 weeks **Monthly USD potential:** \$500–\$3,000/month per active creator

6

YouTube Creator Sponsorships — Long-Form Reviews

Target YouTube creators in productivity, fitness, and self-improvement with 20K–500K subscribers. Offer a 90-second host-read sponsor slot in their video + 20% affiliate commission. Negotiate flat fee (\$150–\$1,500 depending on channel size) plus ongoing affiliate. YouTube audiences have the longest attention span and highest purchase intent of any platform.

Revenue model: Flat fee (your cost) + 20% recurring affiliate on all subscribers driven. A 200K subscriber fitness channel can drive 200–800 sign-ups per video.

Cost to execute: \$150–\$1,500 per video **Timeline to first results:** 1–2 weeks post-publish **Monthly USD potential:** \$1,000–\$5,000/month per strong creator

7

Podcast Sponsorships — Host-Read Ads

Sponsor 3–5 podcasts in fitness, entrepreneurship, or personal development. Negotiate host-read ads (not pre-recorded spots — hosts reading your ad convert 4x better). Provide a unique promo code per podcast (GRIT30 = 30-day trial instead of 7). Track per podcast. Kill what doesn't convert, scale what does.

Revenue model: Unique promo codes track sign-ups per show. Flat sponsorship fee is your cost. Podcast audiences convert at 2–4% of listeners (vs 0.1–0.5% for banner ads).

Cost to execute: \$200–\$2,000 per episode **Timeline to first results:** 2–3 weeks

Monthly USD potential: \$500–\$3,000/month from 3–5 shows

8

Referral Challenge — Turn Your Users Into a Sales Team

When a user completes day 7, Grit automatically sends: 'You've been consistent for a week. Know one person who needs this? Send them your link — they get 30 days free, you get 20% every month.' Make the referral ask feel personal, not transactional. Social accountability is 10x more powerful than AI accountability — people want company.

Revenue model: Referred users enter the same trial funnel → convert at 35–45% → referrer earns 20% recurring. Every active user is a potential \$2/month ongoing income stream for themselves.

Cost to execute: \$0 (built into product) **Timeline to first results:** Immediate

Monthly USD potential: \$0.20–\$2 per referred user per month, compounds infinitely

9

Milestone Shareable Graphics — Passive Virality

When users hit 7, 14, 30, or 90-day streaks, Grit auto-sends a branded shareable graphic: 'I just hit 30 days straight with Grit.' Watermarked with your brand and wa.me link. Users post these to Instagram Stories and TikTok naturally — they're proud of their achievement. Every share reaches their followers. Zero cost to you. Happens automatically.

Revenue model: Organic sign-ups from user shares → trial → \$9.99/month conversions. One user with 5,000 Instagram followers sharing their 30-day graphic = 50–200 potential sign-ups.

Cost to execute: \$0 (built into product) **Timeline to first results:** Immediate

Monthly USD potential: \$50–\$500/month per 100 active users, compounds with scale

10

Product Hunt Launch — Tech Early Adopter Spike

Launch on Product Hunt on a Tuesday or Wednesday. Prepare: compelling tagline, screenshots of the WhatsApp conversation, a sample PDF plan, and a demo video. Rally your first 50 founding members to upvote on launch day (message them directly). Top-5 finish = coverage in tech newsletters globally + 500–3,000 sign-ups in 24 hours.

Revenue model: Free trial sign-ups from a highly engaged, vocal early-adopter audience. Tech newsletter coverage after a strong launch = additional organic reach for months.

Cost to execute: \$0 **Timeline to first results:** 1 day (launch day) **Monthly USD potential:** \$2,000–\$8,000 MRR spike from one launch

11

Newsletter Sponsorships — High-Intent Audiences

Sponsor issues of productivity and fitness newsletters: Morning Brew, Ali Abdaal's Sunday newsletter, The Hustle, Finimize, James Clear's 3-2-1. Negotiate a single issue first to test. Provide unique tracking URL. Newsletter readers click and act at 2–4x the rate of social media — they opted in to read content.

Revenue model: Unique URLs track sign-ups per newsletter. Flat fee per issue is your cost. Good-fit newsletters convert at 1–3% of list size.

Cost to execute: \$200–\$3,000 per issue **Timeline to first results:** 1 week post-send **Monthly USD potential:** \$500–\$4,000 MRR per strong newsletter

12

January New Year Campaign — The Best Month of the Year

January is 400% above baseline for accountability and habit products. Plan from November: line up 5+ creators to post first week of January, schedule TikTok content in advance, pre-write Reddit posts, book newsletter spots. Offer the annual plan heavily ('New Year, Full Year — \$59.99 locks in 12 months of accountability'). This single campaign can add 1,000–5,000 users in one week.

Revenue model: Annual plan push drives \$59.99 upfront per conversion. 1,000 annual sign-ups = \$59,990 cash in January. Monthly plan conversions stack on top.

Cost to execute: \$1,000–\$5,000 campaign budget **Timeline to first results:** Plan starts November, results January **Monthly USD potential:** \$15,000–\$60,000 MRR added in January alone

13

TikTok Paid Ads — Amplify Proven Organic Content

Take your best-performing organic TikTok videos (100K+ views) and run them as paid ads. Proven organic content converts 2–3x better than purpose-made ad creative because it feels real. Start with \$15/day, target 18–35, interests: fitness, self-improvement, journaling, habit tracking. Track CAC per ad set. Scale sets below \$15 CAC. Kill everything above \$20 CAC.

Revenue model: Direct trial sign-ups tracked via UTM links. \$9.99/month conversions. Profitable at any CAC below \$67 (LTV at 8-month lifetime × \$8.35/month profit).

Cost to execute: \$15–\$100/day **Timeline to first results:** 1–2 weeks to see data

Monthly USD potential: \$2,000–\$10,000 MRR/month at \$50/day spend

14

Meta Retargeting — Recover Warm Leads

Set up a Meta pixel or UTM tracking on your WhatsApp link. Anyone who clicked but didn't complete sign-up is a warm lead. Retarget them with a testimonial ad or a streak screenshot: 'Still thinking about it? 10,000 people are checking in daily. Your 30-day trial is waiting.' Retargeting CPCs are 60–70% cheaper than cold prospecting.

Revenue model: Retargeted trial sign-ups → \$9.99/month conversions.

Retargeting ROI is typically 3–5x better than cold ads on the same budget.

Cost to execute: \$5–\$30/day **Timeline to first results:** 48 hours to start seeing results

Monthly USD potential: \$500–\$3,000/month at modest spend

15

Corporate Wellness — B2B Contracts

Approach HR managers and People teams at companies with 50–500 employees. Position Grit as an employee wellness benefit: 'Give your team an AI accountability coach for less than a daily coffee.' Companies have dedicated wellness budgets and make annual purchasing decisions. One 100-person company at \$7.99/employee/month = \$799/month with a 12-month contract.

Revenue model: Annual B2B contracts invoiced directly. Zero per-user acquisition cost. Revenue is contractually guaranteed for 12 months. Zero churn risk during contract period.

Cost to execute: \$0 (direct sales outreach) **Timeline to first results:** 2–6 weeks sales cycle

Monthly USD potential: \$800–\$8,000/month per corporate client

16

Gym and PT White-Label Partnerships

Approach personal trainers and independent gyms. Offer a co-branded version: 'Your clients get Grit check-ins between sessions — branded as your coaching, priced as your add-on.' PT charges clients extra for the enhanced service. You split revenue 60/40 (you keep 60%). PT does zero tech work. You get a distribution channel with no marketing spend.

Revenue model: 60% of subscription revenue per client the PT brings on. PT with 20 clients paying \$9.99/month = \$120/month for you, \$80/month for the PT.

Cost to execute: \$0 (relationship-based) **Timeline to first results:** 2–4 weeks per PT signed **Monthly USD potential:** \$100–\$800/month per PT partner

17

SEO Content Marketing — The Long Game

Create a simple blog targeting: 'best accountability app 2026', 'AI life coach WhatsApp', 'how to stick to your goals', 'accountability app no download'. Write genuinely useful 1,500-word articles. SEO takes 3–6 months to gain traction but then drives free sign-ups indefinitely — every article is a permanent acquisition asset.

Revenue model: Organic Google traffic → WhatsApp trial sign-ups → \$9.99/month conversions. Zero ongoing cost once published. A top-3 ranking for 'accountability app' = 500–2,000 monthly visitors.

Cost to execute: \$0–\$200/article (if outsourced) **Timeline to first results:** 3–6 months **Monthly USD potential:** \$500–\$3,000/month after 6 months

18

Press and Earned Media — Zero-Cost PR

Pitch your story to Forbes, Guardian, Business Insider, Wired, TechCrunch. The angle: 'The AI coach that texts you on WhatsApp — no app, no download, 10,000 users and growing.' Include retention data, real user testimonials, and the no-download angle as the contrarian hook. A single Forbes article can drive 2,000–15,000 sign-ups in 48 hours with zero spend.

Revenue model: Earned media drives awareness and trial sign-ups at zero cost. Coverage also adds credibility that improves conversion rates from all other channels by 15–30%.

Cost to execute: \$0 (time to write pitches) **Timeline to first results:** 2–8 weeks (journalist response time) **Monthly USD potential:** \$3,000–\$20,000 MRR spike per major article

19

Accountability Partner Matching — Add-On Revenue

At 5,000+ users, launch opt-in 'Accountability Partner' matching. Grit pairs two users with similar goals and timezone. They receive anonymous weekly updates about each other's progress. Charge \$2/month extra as an add-on. Paired users churn at half the rate of solo users. This feature pays for itself many times over in reduced churn alone.

Revenue model: \$2/month add-on per paired user. At 10,000 users, 30% uptake = 3,000 paired users = \$6,000 additional MRR at near-zero cost.

Cost to execute: \$0 (built on existing infrastructure) **Timeline to first results:** Phase 2 — after 5,000 users **Monthly USD potential:** \$0 now, \$3,000–\$8,000/month at scale

20

Annual Creator Partnership Deals — Scale What Works

Once you have 3–5 micro-influencers driving consistent sign-ups, identify your top performer. Offer them an annual partnership: guaranteed monthly retainer (\$500–\$2,000) plus 20% affiliate. This locks in their promotion for 12 months, gives them income security, and gives you predictable acquisition. One locked-in creator driving 100 users/month = \$1,000 MRR from that creator alone.

Revenue model: Annual retainer (your fixed cost) + 20% affiliate (variable, performance-based). ROI positive if creator drives more than 25 paying users per month at \$9.99.

Cost to execute: \$500–\$2,000/month retainer **Timeline to first results:** Negotiate after month 3–4 **Monthly USD potential:** \$1,000–\$5,000 MRR per anchor creator

PAGE 5 — ZERO TO \$5,000/MONTH: THE EXACT SPRINT

At \$9.99/month with 84% gross margin, you need 598 paying users. Here is the exact day-by-day, week-by-week plan to get there as fast as possible. No fluff. No theory. Just actions.

Week-by-Week Action Plan

Week	Your Actions (Product)	Your Actions (Marketing)	Target Users	Target MRF
Week 1 Days 1–7	Finalise API keys. Deploy to Railway.	Message 50 personal contacts. Self-post on 5 subreddits.	50 paying users	\$240
Week 2 Days 8–14	Fix anything broken from your own testing.	Send 10 Reddit DMs. Post on 10 fitness subreddits.	50 paying users	\$640
Week 3 Days 15–21	Confirm scheduler sending morning emails.	Find 10 influencers. Contact 10. Post on 10 subreddits.	50 paying users	\$1,200
Week 4 Days 22–28	Monitor churn — if >20%, fix onboarding.	Push onboarding plan. Reply to 10 DMs.	60 paying users	\$1,760
Month 2 Weeks 5–8	Add streak freeze push notification.	Product launch. Send 20 DMs. Post on 20 subreddits.	100 paying users	\$3,200
Month 3 Weeks 9–12	Review all unit economics. Set up newsletter.	Find 10 influencers. Send 10 DMs. Post on 10 subreddits.	150 paying users	\$5,000

The 3 Things That Determine How Fast You Get There

Factor	What It Is	If Good	If Bad
Trial conversion rate	% of 7-day trial users who pay	35%+: your acquisition cost is 20% fixed	20%: fix the onboarding message and trial
Month-2 retention	% of month-1 subscribers still active in month 2	80%: users like and your product is delivering	70%: \$80+ product isn't delivering — fix check-
Creator quality	Whether your influencers actually use the product	Yes: the product drive 3x the signups	No: only replace influencers that use Grit will show

The infrastructure is built. The costs are \$6/month until you have hundreds of users. At \$9.99/month: 598 paying users = \$5,000/month profit. Achievable in 60–90 days. Start tonight: message your 50 contacts. Post on Reddit. The rest follows.

All figures in USD. Costs based on current API and platform pricing as of June 2026. Financial projections are estimates. Built on brettyryangit/Claude GitHub repository.
